January 12, 2011

Dear Valued Customer,

We are pleased to announce that Belden has acquired the assets of ICM Corporation, which includes F Conn[®] brand connectors, Cable Pro[®] brand tools, Powertronics[®] brand power supplies, Home Integrations Products[®] brand connectivity, and Cable Ready[®] brand molding. This acquisition, when combined with the acquisition of the Thomas & Betts communications products business, will further strengthen Belden's position as an end-to-end solution provider within the broadcast, audio/video, broadband and security markets.

By adding these well known brands of coaxial connectors, tools and components to our existing portfolio of broadcast, audio/video, broadband and security cables, Belden will help you capitalize on your continued need for network reliability solutions delivered in the most cost efficient manner possible. We anticipate a smooth transition, and want to assure you that serving *you* with our full portfolio of high-quality products and services will continue to be our top priority.

Together we are committed to delivering you best-in-class innovation, quality and service. Over the next few weeks, your sales representative will be contacting you with further integration details. Until then, there are no changes to our customer operations.

Thank you for your continued support. If you have any questions, please do not hesitate to contact us.

Our best regards,

Glenn Pennycook
President
