27-982 TECPRO CL982 CUE LIGHT, RED

27-983 TECPRO CL983 CUE LIGHT, AMBER

27-985 TECPRO CL985 CUE LIGHT, GREEN

27-986 TECPRO CL986 CUE LIGHT, BLUE

27-989 TECPRO CL989 CUE LIGHT, WHITE

Features

This unit can be connected, at any point, to a Tecpro Communications System.

The front panel contains the XLR loop though connectors and a "Call Light" switch.

The switch has two states allowing illumination as a steady continuous light or flashing.

When a call button is pressed on any station in the Tecpro system, the Cue Light will produce a high power continuous light or fast, continuous flash, as set by the switch.

Units are available with different coloured LEDs: red, amber, green, blue and white.

TECHNICAL SPECIFICATION

Power Requirements:	24V 100mA (Taken from connected Tecpro circuit.)
Connectors:	XLR 3-pin male and female – system loop-through.
Dimensions:	93 x 72 x 107mm
Weight:	300g
Construction:	Standard extruded box, type 85
