

Developed for the offshore oil industry, and used by companies such as Shell, ICI, ARCO, Air Products and Dow Chemicals to help prevent trip hazards and cable damage, these high-quality non-conductive thermoplastic S-shaped hooks have numerous uses in supporting cables and other loads, during installations, maintenance or on location. Note that these products are intended for the support of static loads against walls, barriers, scaffolding etc. They are not intended for lifting work, where statutory regulations may apply.

Specifications

Cable opening size	70 mm	(2.76")
Maximum load	55 kg	(121 lbs)
Weight	105 grams	(0.23 lbs)
Min working temp	-20°C	(-4°F)
Max working temp	200°C	(392°F)
Material	Glass reinforced polyester
